

Pet Insurance for your New Furry Friend

At North Pole Veterinary Hospital, we have three top recommendations for insurance coverage for your new pet. There are other companies out there but we have had the most success working with these three. All three of these insurance companies have clients in mind. They have websites and apps for easy access and are reachable 24 hours a day, 7 days a week.

Trupanion Pet Insurance has a lot of great features but one of the best features is their VetDirect Pay. Most insurance companies have you pay then refund you once the claim has gone through. With Trupanion once your deductible has been met, they give you the option of VetDirect Pay where they automatically pay our hospital 90% of the coverable expenses. They have a vet portal for us too so we can get your claims submitted faster. They also have multi pet discounts as well.

Embrace Pet Insurance is a great option for our military members who live in the area and also for pet owners who are interested in insurance that covers wellnesses, vaccines, as well as supplements at a reasonable price. Embrace gives an active-duty military discount as well as a multi pet discount which makes it a great option for owners with price in mind.

Nationwide

Nationwide is one of the few pet insurances that offer coverage for exotic and avian pets. Some employers in our area use Nationwide for insurance and when paired with the owner's Nationwide insurance may come with a discount.

Please see the front desk with any other questions you may have regarding pet insurance.
